

The background features a gradient from dark purple at the top to deep blue at the bottom, speckled with white stars. Overlaid on this are several faint, light-colored circular patterns. Some are solid lines, while others are dashed. Some circles have arrows indicating a clockwise direction. One large circle on the left has degree markings: 140, 150, 160, 170, 180, 190, 200, 210, 220, 230, 240, 250, and 260.

WELCOME

Devi Ahilya Vishwavidyalaya, Indore

INDORE LEVEL HACKATHON 2026

Date:
17 March 2026

Time:
8am – 5pm

TEAM:
3 & 4
MEMBER

PRIZES WORTH UPTO

₹21,000+

EARLY BIRD REGISTRATION
@540 PER TEAM

Themes:
Artificial Intelligence
Cyber Security
WebRTC

For technical support:
Sakshi : 8827467903
Yogesh : 9400707351

For event enquiry:
Madhav : 6232787744
Abhay : 9971612509

Faculty Coordinators:
Dr. Jalal Dr. Uikey
Ms. Patidar Dr. Rai

Register now
<https://scs.dauniv.ac.in/>

**Venue: School of Computer Science and Information Technology,
Devi Ahilya Vishwavidyalaya, Indore**

Organized By
E-Cell SCST
@ecell_scst

THE HACKATHON WILL BE IN TWO PHASES:-

- **PHASE ONE:-Concept & Design Presentation**
- **PHASE TWO:-Working Prototype & Impact Presentation**

PHASE ONE

(Concept & Design Presentation)

Slide Limit: Maximum 3 Slides

This phase focuses on **idea validation, conceptual clarity, and technical planning.**

Participants are required to present the following:

1. Prototype Concept

- Participants must clearly explain:
- The **problem statement understanding**
- The **proposed solution idea**
- The **core functionality of the product/system**
- A basic **prototype representation** such as:
 - Wireframes
 - UI sketches
 - Flow diagrams
 - Concept mock-ups

PHASE ONE

(Concept & Design Presentation)

2. Product Design & System Architecture

Participants must include:

Product Design

- .User Interface (UI) layout or screen flow
- .Navigation structure
- .User interaction logic
- .Key modules/features

System Architecture

- Overall technical structure of the system
- Frontend–Backend interaction
- Database usage
- API integrations (if any)
- Cloud / Hosting / Deployment concept

PHASE TWO

(Working Prototype & Impact Presentation)

Slide Limit: Maximum 5 Slides

This phase focuses on **implementation capability, practical feasibility, and real-world relevance.**

Participants must present:

1. Working Prototype Demonstration

- Functional implementation of the proposed solution
- Screenshots / demo flow / short execution explanation
- Key implemented features
- Technologies actually used

PHASE TWO

(Working Prototype & Impact Presentation)

2. Product Limitations

Participants must honestly identify:

- Technical constraints
- Scalability challenges
- Performance issues
- Feature gaps
- Dependency risks

3. Stakeholder Benefits

Participants must explain:

- Who are the primary stakeholders (users, organizations, society, industry etc.)
- How the solution provides **value or improvement**
- Efficiency, cost reduction, accessibility, or innovation impact

PHASE TWO

(Working Prototype & Impact Presentation)

4. Real-World Use Cases

Participants must provide:

- Practical scenarios where the product can be implemented
- Industry/domain applicability
- Example workflows showing real usage
- Potential for future enhancement or commercialization

General Presentation Guidelines

- Maintain **clarity, conciseness, and logical flow**
- Use **diagrams, charts, and visuals** instead of heavy text
- Avoid overcrowding slides
- Clearly mention **team name, project title, and problem statement**
- Use professional fonts and consistent formatting
- Ensure **technical accuracy and feasibility**

Evaluation will be based on:

- Innovation & clarity of concept
- Technical planning and architecture
- Implementation effort
- Practical relevance and impact

THANK YOU
